

# Medical Concierge Service

The complete medical advocate solution.

# Medical Concierge Service

In the event that you are in need of a non-emergency medical procedure in the U.S., our Medical Concierge will help you decide on a facility that provides the quality care you need in the most cost-effective setting. The procedure can be in or out-patient, and as simple as a MRI or as complex as a transplant. You will receive easy-to-understand information relative to the costs of the procedure at competing facilities. In addition, when you use this service your plan may be eligible for discounts. Armed with these facts, you can make informed decisions as to where to have procedures performed, which will effectively reduce your health care costs.

To take advantage of this service, just notify the Medical Concierge that a procedure is necessary. The Medical Concierge will then go to work for you, providing you with the facilities that have the highest quality rating and can provide the service in the most cost-effective manner. Additionally, you may receive verification of physician admitting privileges, verification of PPO participation, educational material concerning your procedure, assistance with scheduling appointments and more.

IMG's Medical Concierge helps maximize your outcome when seeking medical care.
